

Greetings Zafia,

While you were away these days, we've had some problems.

Like on Wednesday while we were watching a presentation on a projector it suddenly started to overheat a lot. So, we open it and found out that, one of its filters was very dirty so we cleaned the projector and it stopped overheating.

On Thursday Alex the salesman came and said his laptop was very slow so we changed the RAM and also cleaned the laptop. Later that day our Internet connection was very poor so I called our Internet provider and they told me that they were repairing an antenna and we had to wait until they finish. Fortunately, next day the internet connection got better and faster.

I hope you are having great time. Everything is fine here.

Yours sincerely,  
Raunak
